Department of Network Information Technology

Course: Data and System Security

Instructor: Eng. Baraa Sahmoud

Assignment 1

Task Description:

In this assignment, you are required to complete the following tasks after watching Lab 1:

1. Open the terminal and navigate to your Desktop:
2. Create a new directory called 'test_folder':
3. Move into the 'test_folder' directory:
4. Create a new text file called 'info.txt':
5. Add the text 'Hello from Kali!' into the file:
6. View the contents of the file using the cat command:
7. Show the path you are currently on (pwd)

8. Create another directory inside the Desktop called backup_folder:

9. Copy the file info.txt from test_folder to backup_folder:

10. Take a screenshot of your terminal showing the result of the all commands and paste it into this document.

Submission Guidelines:

- Submit this document after completing all tasks.
- Make sure your screenshots are clearly visible.
- Name your file as: Assignment1_YourName
