Data & System Security

Assignment 1

Presented to: Eng. Baraa Sahmoud

Student name: Deema Mohammed AL-Maqadma

Student number: 2320230766

Semester: Secound Semester 2025/2026

1) Navigate to Desktop

Command: **cd Desktop**

Definition: Move into the Desktop directory.

```
terminal@terminal-temple ~ $ cd Documents
terminal@terminal-temple Documents $
```

2) Create test_folder

Command: **mkdir test_folder**

Definition: Make a new folder named test_folder.

```
terminal@terminal-temple Documents $ mkdir test_folder
terminal@terminal-temple Documents $ ls
empty-file.txt                plan-for-world-domination.txt
test_folder
```

3) Enter test_folder

Command: **cd test_folder**

Definition: Go inside the test_folder directory.

```
terminal@terminal-temple Documents $ cd test_folder
terminal@terminal-temple test_folder $
```

4) Create info.txt

Command: **touch info.txt**

Definition: Create an empty text file.

```
terminal@terminal-temple test_folder $ touch info.txt
terminal@terminal-temple test_folder $ ls
info.txt
```

5) Write text into info.txt

Command: **echo "Hello from Kali!" > info.txt**

Definition: Add text to the file.

```
terminal@terminal-temple test_folder $ echo "Hello from Kali!" > info.txt
```

6) View file content

Command: **cat info.txt**

Definition: Show what is inside the file.

```
terminal@terminal-temple test_folder $ cat info.txt
Hello from Kali!
```

7) Show current path

Command: **pwd**

Definition: Display your current directory path.

```
terminal@terminal-temple test_folder $ pwd
/home/terminal/Documents/test_folder
```

8) Create backup_folder on Desktop

Command: **cd .. && mkdir backup_folder**

Definition: Go back to Desktop and create backup_folder.

```
terminal@terminal-temple test_folder $ cd .. && mkdir backup_folder
terminal@terminal-temple Documents $
```

9) Copy info.txt to backup_folder

Command: **cp test_folder/info.txt backup_folder/**

Definition: Copy the file into the backup folder.

```
terminal@terminal-temple Documents $ cp test_folder/info.txt backup_folder/
```

```
terminal@terminal-temple Documents $ cat backup_folder
Hello from Kali!
```

Conclusion:

In this assignment, we practiced basic Linux commands: moving between folders, creating files, writing text, viewing content, checking our path, and copying files. These steps build the foundation for working in Kali Linux.
